

SAVE THE PLANET

©Kath Bee 2007

Well, there's a hole in the ozone layer
And there is global warming
Simple things that we can do, like unplug the tele and the DVD too
And turn of the lights and the heater when we're not in the room
Save the planet, help save the planet x2

Well there is rubbish everywhere
Bigger piles every year
Kerbside recycling is the way to go, and give your old clothes to
someone you know
And put your scraps in the compost to help your garden grow
Save the planet, help save the planet x2

BRIDGE

We've got to RE-THINK – make a plan
We've got to RE-USE – the things we can
We've got to RE-CYCLE – new from old
We've got to RE –DUCE and lighten the load
On our planet, help save the planet
Save the planet, help save the planet

Well, there's pollution in the air
Endangered species everywhere
Share a car, go on, don't wait and walk, bike, scoot, bus, run or skate
And help save an animal or plant you like from a terrible fate
It's never too late to
Save the planet, help save the planet x6

BRIDGE

It's never too laaaaaaaaaaaaaate!!!!
